# CREATE YOUR OWN STORY

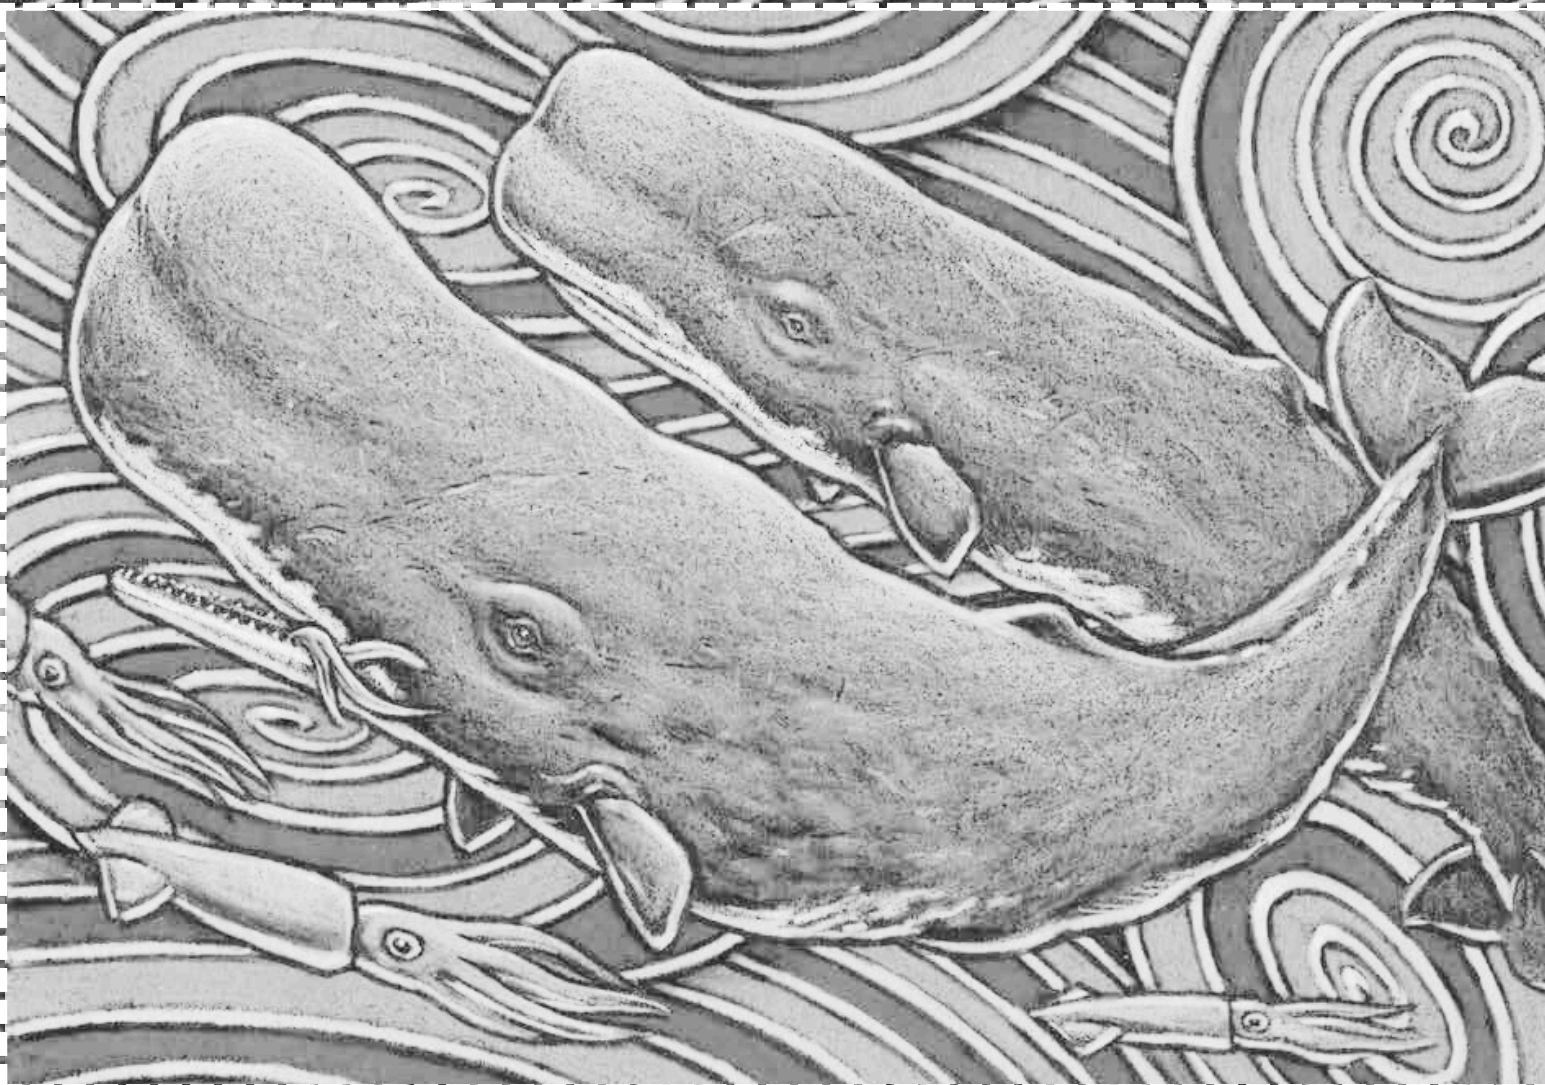

Get ready to let your imagination soar! Follow these simple steps to cut, arrange, and create your very own story:

## **What You'll Need**

- Scissors (ask an adult for help!)
- Images from the book (see next page)
- Markers, crayons, or pencils
- Blank paper
- Tape or glue

## **Write or Tell Your Story:**

- If you love to write, grab a pencil or pen. Tape or glue your pictures onto sheets of paper and write your story under the pictures. Add a title to the first page. Now you have made a book!
- If you prefer telling stories, practice sharing your tale aloud with classmates, friends, or family!

# WORD SEARCH

Can you find the words hidden in the puzzle?

B	S	U	D	J	Q	Y	D	V	S	U	T
H	S	I	U	M	E	O	K	P	V	A	D
U	E	U	S	A	R	D	I	N	E	S	R
M	L	S	H	A	R	K	S	I	E	A	K
S	A	A	I	M	A	F	I	T	I	E	E
U	H	L	N	M	O	O	N	F	I	S	H
N	W	M	A	T	U	R	T	L	E	H	I
F	M	O	E	T	I	A	T	T	G	T	N
I	R	N	B	E	O	C	E	A	N	A	D
S	E	D	O	L	P	H	I	N	E	E	R
H	P	T	A	P	L	A	D	I	V	E	R
D	S	F	T	L	Y	E	R	E	L	F	R

**TURTLE**

**BOAT**

**MOONFISH**

**SALMON**

**DOLPHIN**

**DIVER**

**SUNFISH**

**SHARKS**

**SPERM WHALES**

**OCEAN**

**SARDINES**

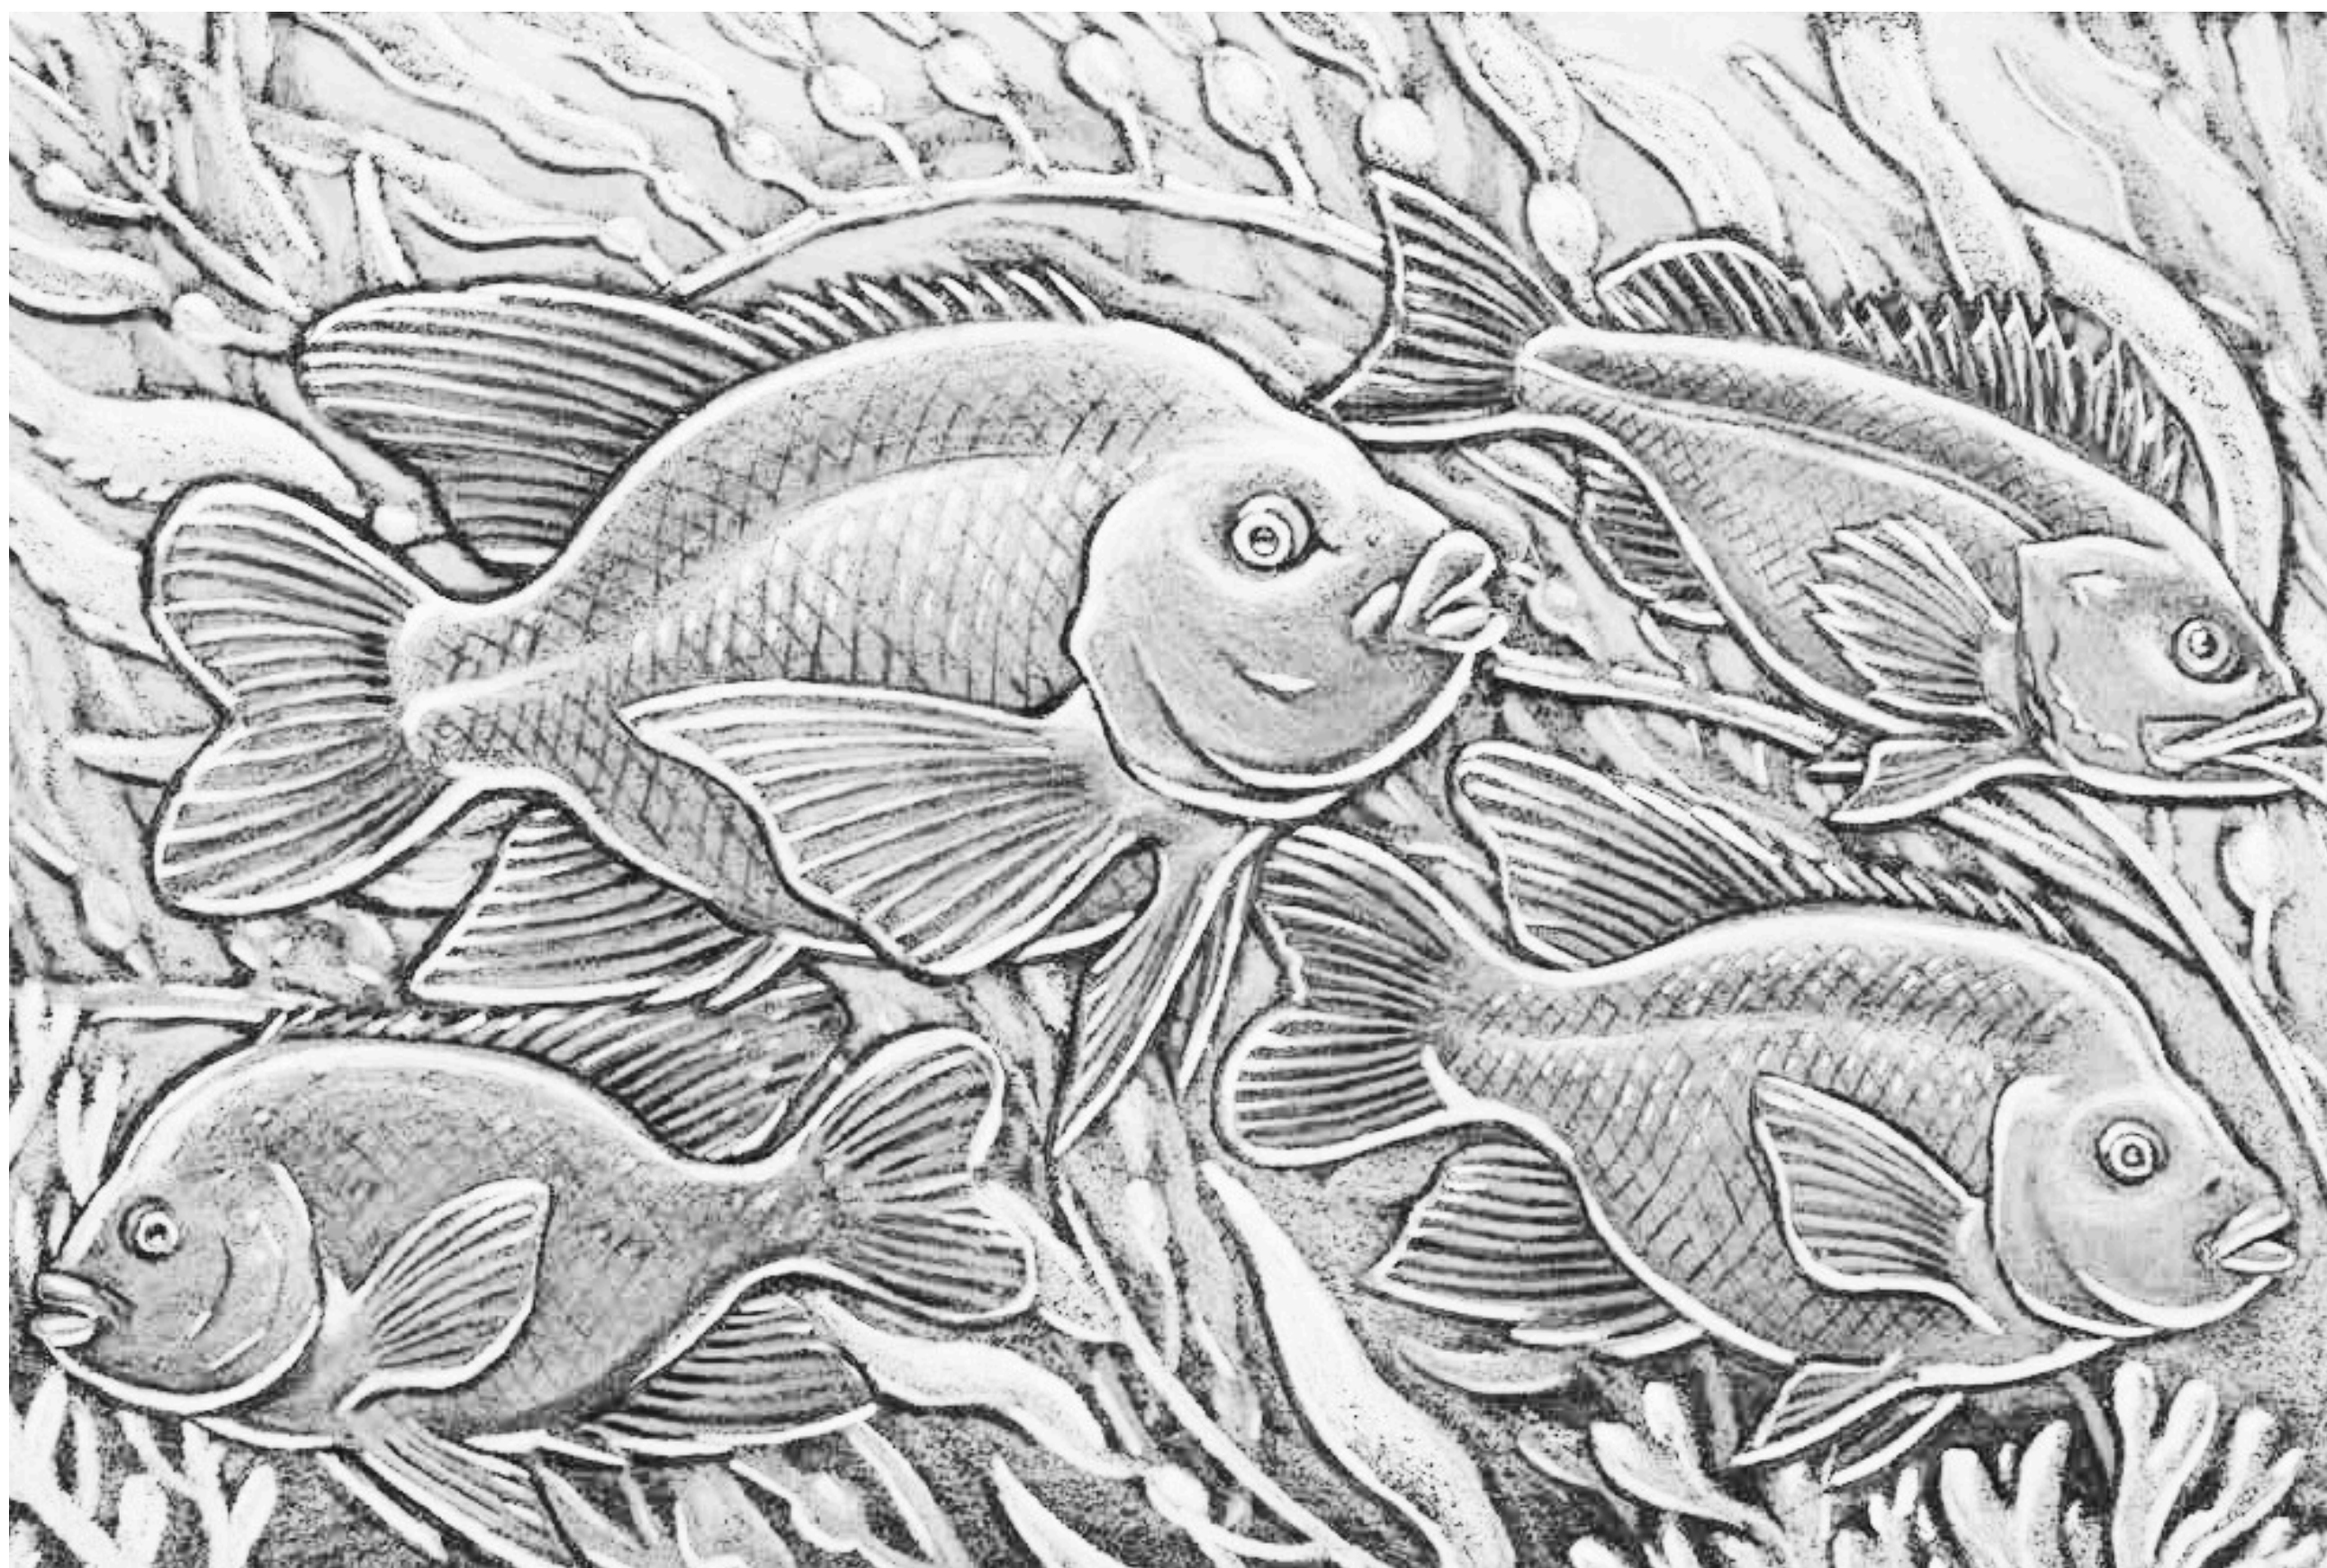

**SEA**

# CAN YOU SPOT THE DIFFERENCES?

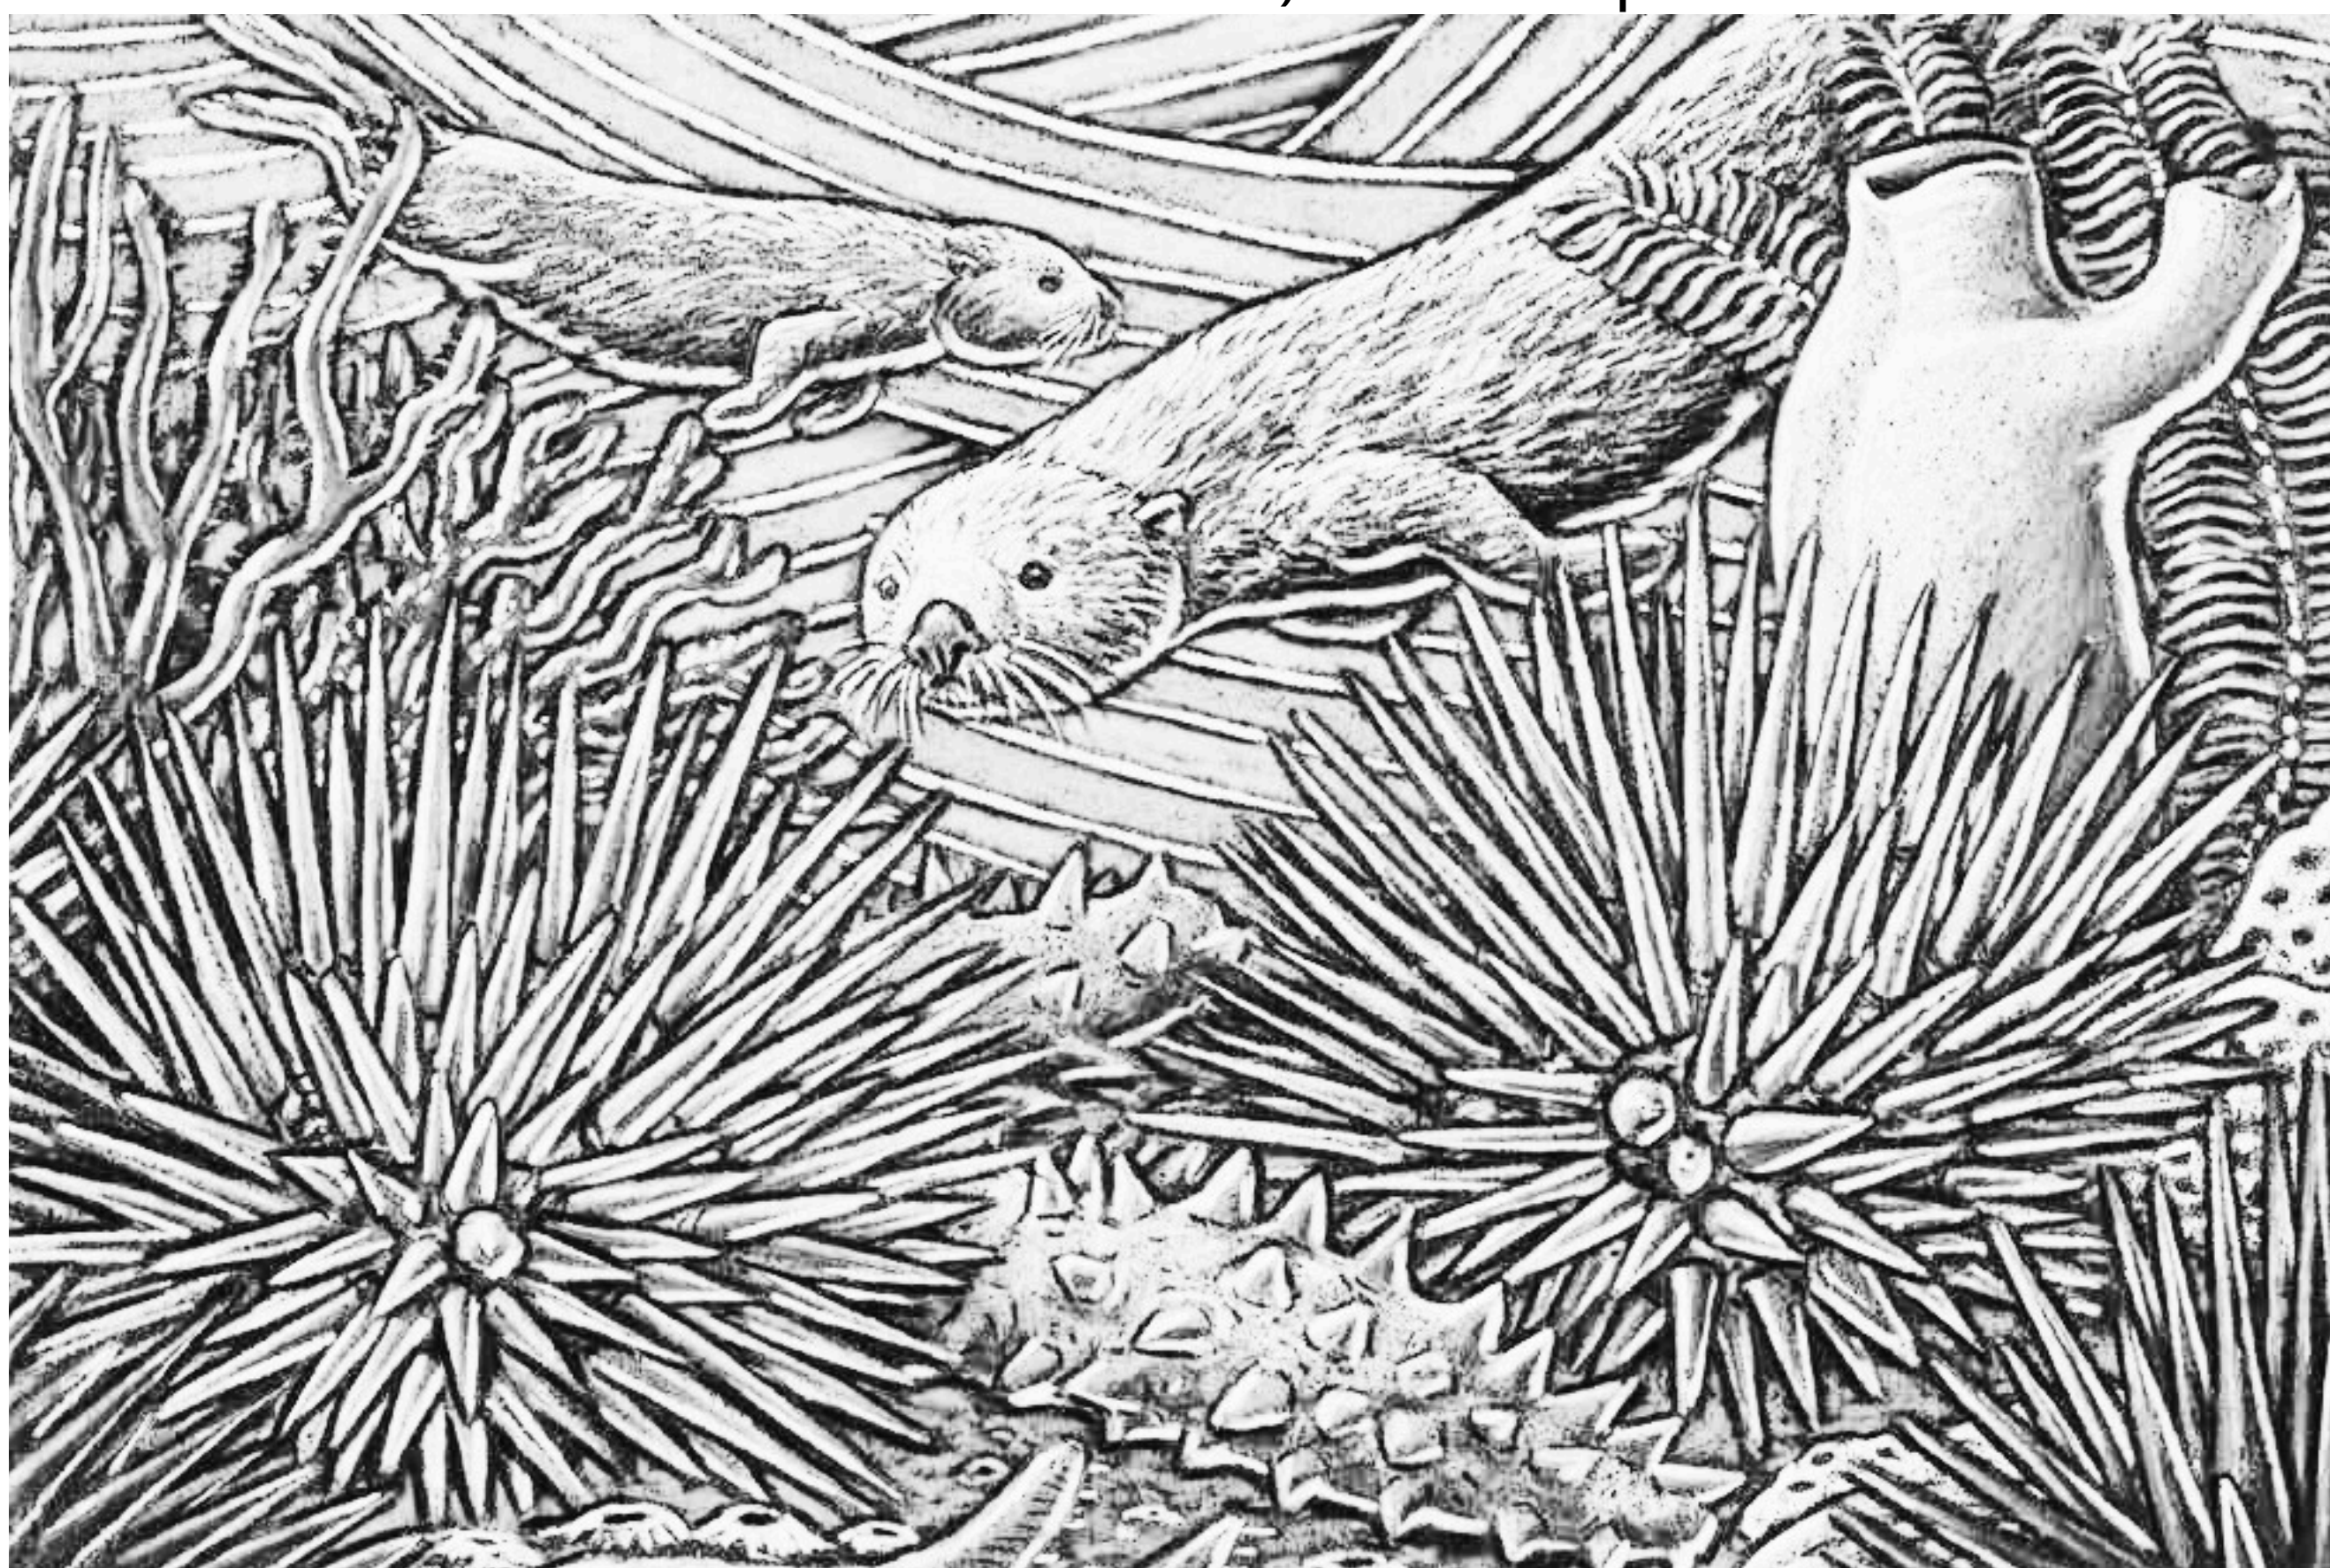

**ON THE BOTTOM:** THERE IS A MISSING FISH ON THE FAR LEFT CORNER; THERE IS AN EXTRA FISH IN THE TOP RIGHT CORNER; THERE IS A MISSING DOLPHIN IN THE TOP RIGHT CORNER

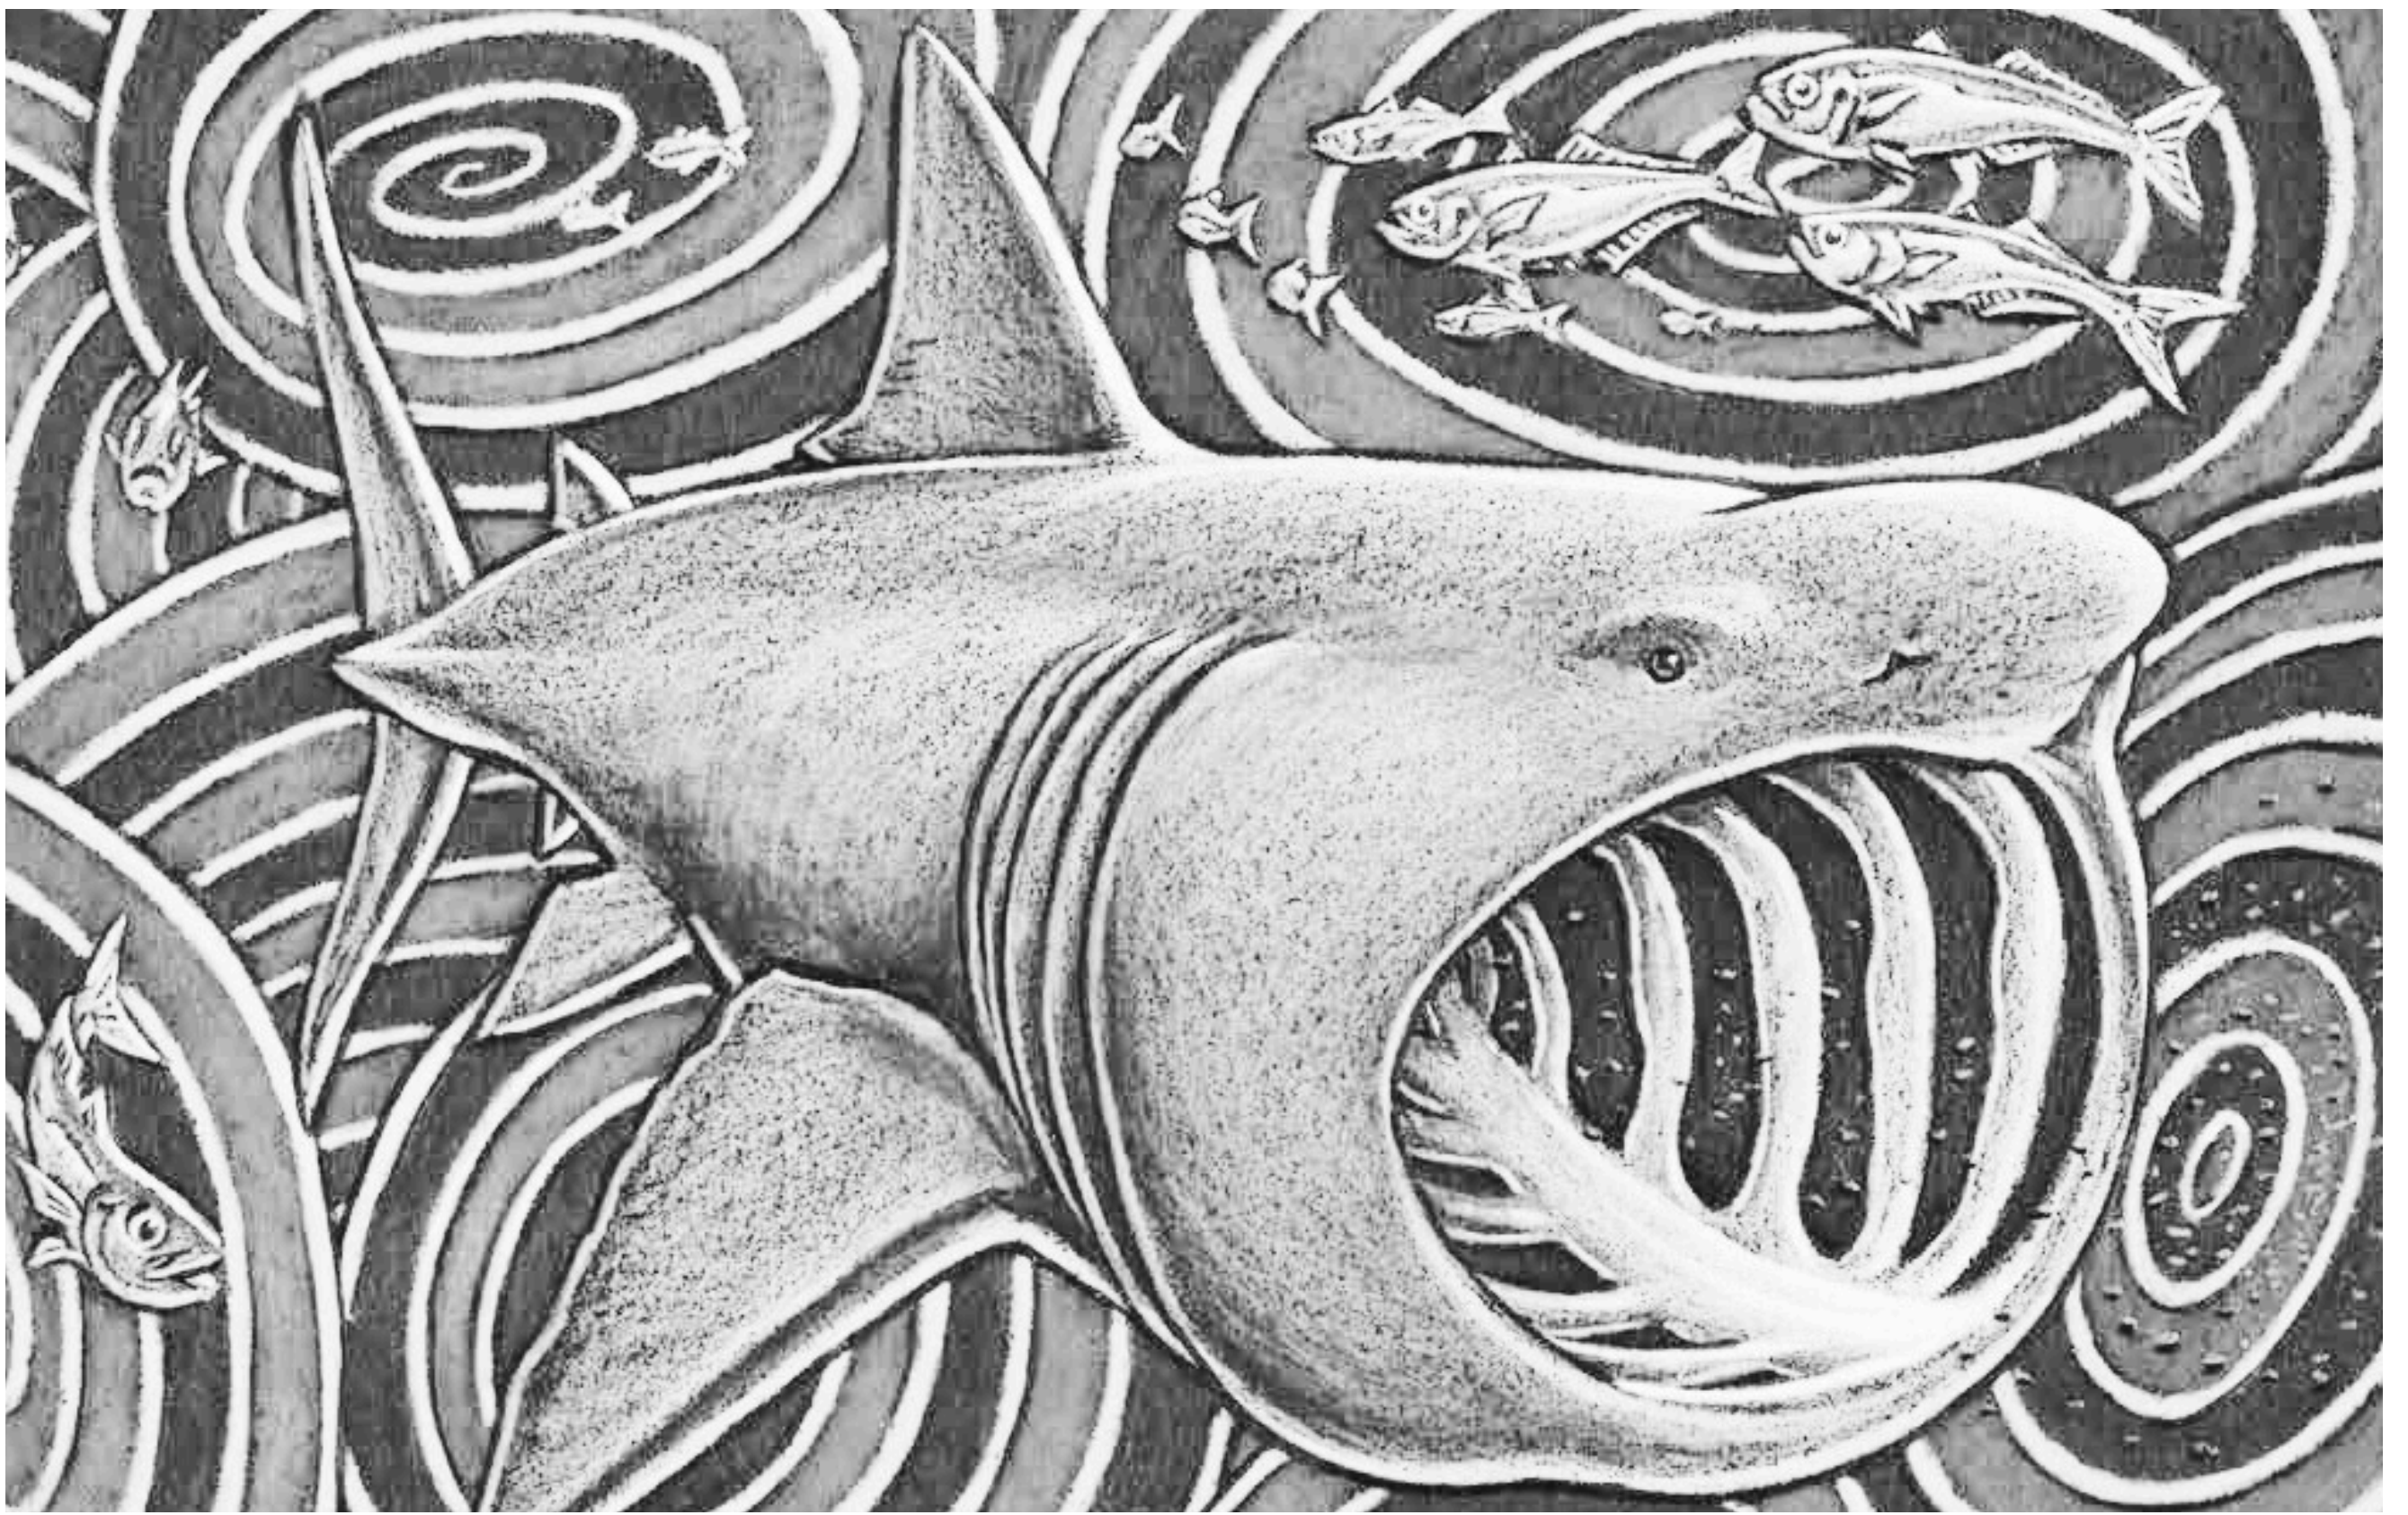

# COLORING PAGES

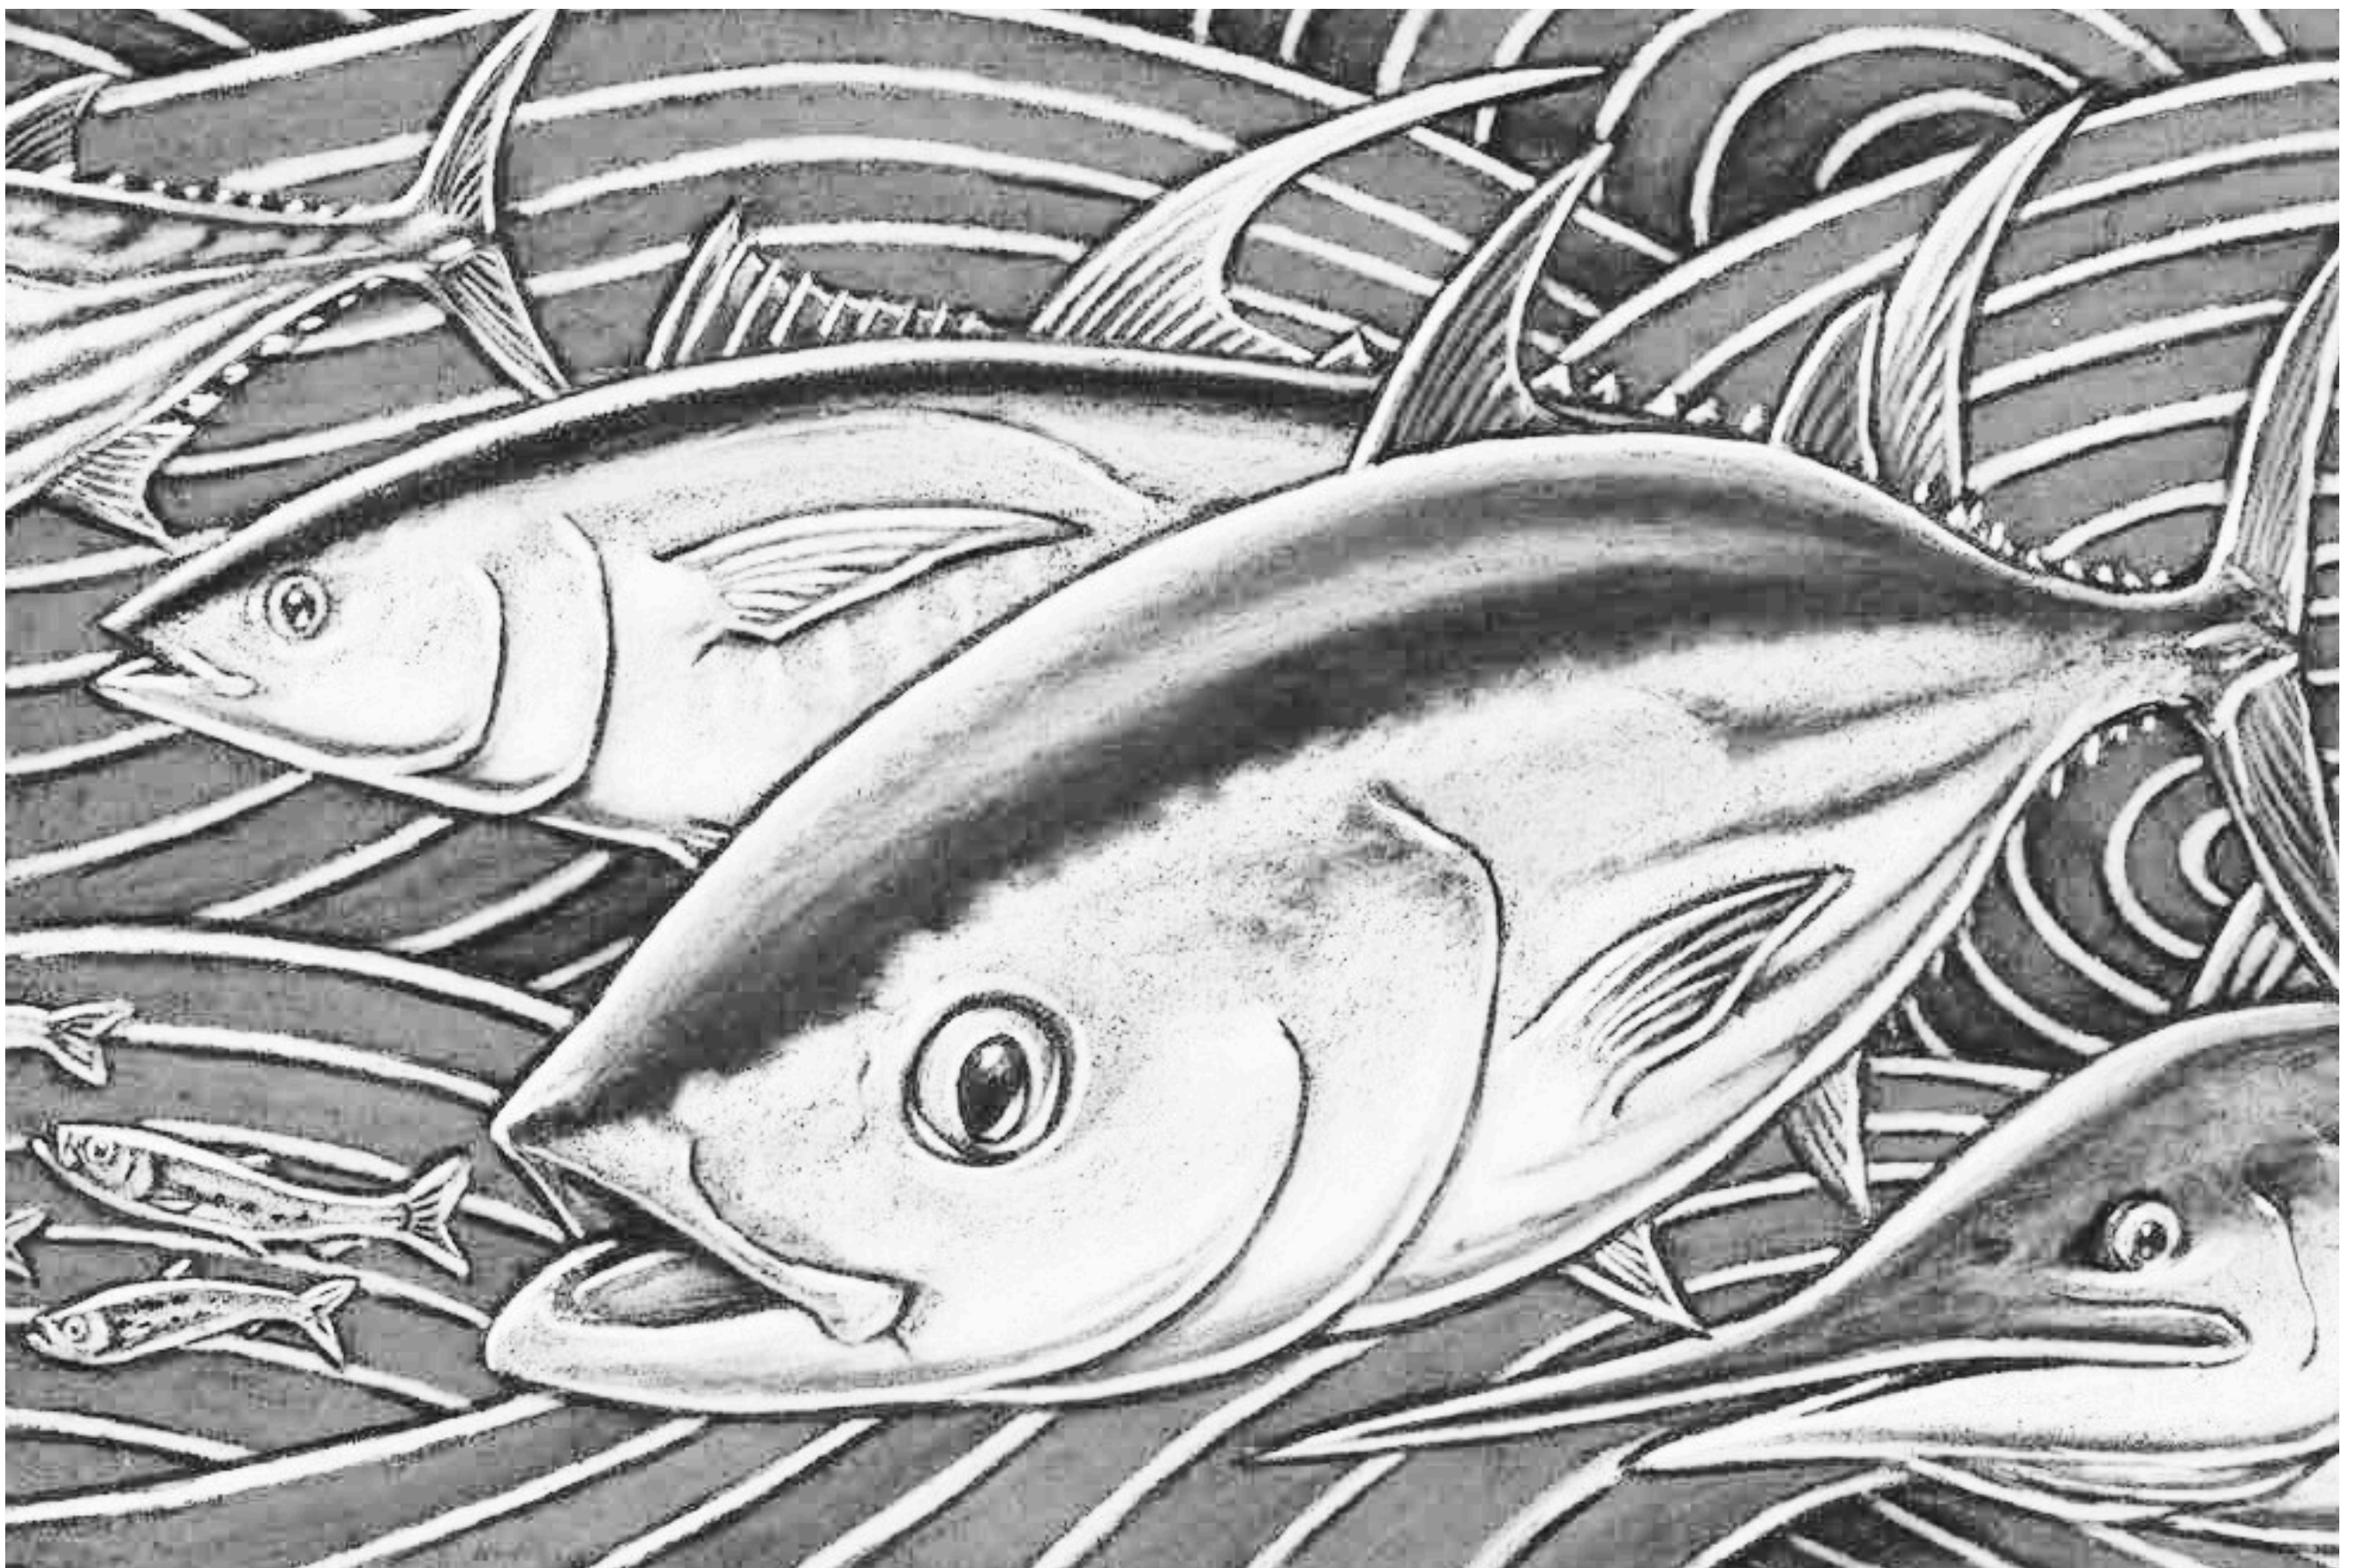

**Garibaldi fish** live in forests of seaweed, called kelp.

**Sea otters** feed on **sea urchins** near the shoreline.

**Basking sharks** grow to 25 feet long. They feed on tiny animals, called zooplankton, as they swim.

**Yellowfin tuna** are fast, powerful predators.

Japanese divers collected **abalone**, a kind of shellfish, in shallow waters.

**Flying fish** escape predators, such as the **mahi-mahi**, by leaping from the water and gliding on long, wing-like fins.
